

## Aston Martin DB6 / DB5 Engine For Sale.

DB6 Engine Complete

**£0.00**  
**£0.00 inc VAT**

### Product Description:

A very rare opportunity to purchase a complete 6 Cylinder engine from a DB6. The engine is suitable for DB5/6 & DBS6 models and is \*supplied, as pictured, complete with ancillaries, ready to drop in and use. The engine has benefitted from a comprehensive re build to 4.2L specification around 10 years ago and was part of a full body of restoration completed to a high standard. The car was part of a large collection from one of our most discerning clients and was seldom used after the restoration was completed.

Along with the engine we have the original 5 speed Z-F gearbox that has also benefitted from comprehensive rebuild at the time of the restoration.

The engine was removed from the vehicle in January 2021. Video's of the engine running are available by request.

\*The engine and gearbox can be purchased outright, together or split. Engine only, or Gearbox only. We can also discuss supplying the engine with without carburettors or with Weber carbs and manifolds.

We are happy to discuss options and are flexible in specification and can ship the engine worldwide.
