### Product Description:

Autoglym The Collection - Perfect Wheels

Your 3-Step Routine for stunning wheels

1. Clean  
Clean Wheels
2. Polish  
Instand Tyre Dressing
3. Protect  
Alloy Wheel Seal

Clean wheels is the perfect cleaner for regular alloy wheels. The fast acting formula removes dirt and brake dust from your wheels quickly, effectively and safely.

Dressing your tyres returns them to natural black sheen, making older rubber look new again. This is an essential step for the perfectionist.

Alloy wheel seal is a protective coating for all types of wheel. It is easy to use and makes on going wheel care simple. Dirt is caught on the coating rather than attacking the wheel directly.

Included in this collection:

- 500ml CW
- 500ml ITD
- 450ml AWS
